1. One of my favorite professors, she is amazing. Very receptive to questions and emails. Encourages class engagement. Gets to know students and truly cares about our well being. I'm bad at Econ but I think I will walk out of this class with a good grade. She's a great teacher.
2. Genuinely one of the best teachers I've had at NCSU thus far. Her class has been the only one where I've felt comfortable enough to actively participate every day regardless of if I know the information or not.
3. Really awesome with student questions and very personable. Engaged the class very well. Also took student feedback on how difficult the tests were.
4. Sarah Bainn was a lovely professor to have this semester! She was receptive of the input of students and provided plenty of resources for success in her class.
5. She explained material well and lectures were engaging. She was receptive to emails and was flexible in meeting outside of her designated office hours.
6. Absolutely fantastic teacher, I have nothing bad to say about her. I like how she kept everyone involved in the class and was always re-explaining stuff to make sure we all understood it.
7. Paid attention to each student and gave critical advice regarding what they were struggling on- Went over material multiple times if a student/class did not understand - Weekly emails or reminders - Allowed students to reach out if they ever needed to, very responsive and understanding.
